BENEFITS

- status check of connected devices (aroma pumps, steamgenerator)
- automated operating time with fully automatic programmes for days, weeks and months.
- automatic programme sequences (10 min pause, 10 min with steam, 2 min cleaning phase timers)
- energy optimization through clock-pulse fan control
- password protection for service levels
- expansion through modular boards possible

DESCRIPTION

Technical description:

compact, reasonable, fully automatic control for hamam baths with t w o („Basic“ and „Standard“ versions) or f o u r („Premium“ version) separate temperature control loops.

Application:

Steam-, Hamam- or Serail-baths, electric- or water-heated, with control of steamgenerator and aroma pumps without a temperature control of their own.

3.7" Touch screen (3 colors)

5.7" Touch screen (256 colors)

Touch screen(s) to control your cabin

SEQUENCE OF FUNCTIONS

The facility is activated or deactivated by a sensor which is integrated in the door of the control box („Basic“ and „Standard“ versions) or by a 3.7“ TFT industrial touch screen („Premium version“ optional by a 5.7 TFT touch screen). The further sequence is fully automatic. By means of a display manager all temperatures and time parameters of the „Basic“, „Standard“ and Premium-versions can be altered. The „Premium“ version allows the alteration of the parameters via touchscreen in a service level.

The facility can be deactivated through a button which is integrated in the door of the control box („Basic“ and „Standard“ versions) or via touchscreen („Premium“ version).

Also integrated in the lid of the control box is a sensor for activating the cleaning lights („Basic“ and „Standard“ versions).

The „Premium“ version has 3 sensors in the control box. „all on“, „all off“, and „cleaning lighting“. Through this the cabin can be operated and used even if the touchscreen is out of order.

A function status check of all connected devices such als boilers, aroma pumps, etc. is optionally possible.

CONTROL

Optical fibre projector, LV-halogen spots, electric or water heating systems, aroma pumps, exhaust air and supply air fans, steam-generator, audio system.

Control cabinet

Universal Steambath Control
