

DRUM LIFTER

FUNCTION DESCRIPTION

Drum lifting device for the lifting of the chlorine drums onto the GRANUDOS by a manual lifting appliance. The drum lifter is fixed to the vertical support of the GRANUDOS. The system can easily be retro-fitted at existing machines and enables the operator to handle the chlorine drums effortlessly.

SCOPE OF DELIVERY

- Installation support for the fixation to the GRANUDOS
- Guide rail
- Trolley
- Manual lifting appliance with drum gear
- Fixation material
