

OULUJÄRVI Sauna wood preservative and treatment

Protects against build-up and stains on sauna benches

From now on, unpleasant build-up and stains on sauna benches and other wooden surfaces are history. Regular use makes your sauna room looking new for longer period of time. And the best thing: OULUJÄRVI is an all-natural bio-based product that is completely harmless to health even at high temperatures.

Application

For use in new facilities

- Spray directly onto grease- and dust-free surfaces after construction of the sauna facilities and work in with a sponge. Alternatively, fill into a flat container and then work in with a sponge.
- Repeat after at least 12 hours (at min. 20°C).

For use with existing facilities

- Sand sauna benches or sauna wood and make the surfaces free of grease and dust, e.g. with our PURUVESI sauna wood cleaner, and allow to dry for approx. 12 hours.
- Spray on OULUJÄRVI and work in with a sponge. Alternatively, fill into a flat container and then work in with a sponge.
- Repeat after at least 12 hours (at min. 20°C).

- Suitable for all untreated wooden surfaces in the sauna and wellness area
- Lotus effect through nanotechnology
- Protection against moisture deposits and staining
- Made from natural ingredients, dermatologically harmless, and heat-resistant

- 5,0 L canister
- 1,5 L canister
- 0,5 L spray bottle

1 L sufficient for the treatment of 10 m² bench surface (two coatings)
